

## Sheet Metal Worker On-wing AMRO/ACC/SMA Aviation

### The Role

How exciting is it to be able to do this within an aviation environment with over 100 years of history, where the aircraft are literally right beside you! As a Sheet Metal Worker, you will start working in an environment where you have not worked before?

### What You Will Do

As a Sheet Metal Worker in aviation, you will perform all sheet metal work activities on aircraft, both new construction (VIP, SMA) and repair. Within the position of Sheet Metal Worker, you have the following tasks: you inspect, repair, modify, and maintain aircraft. You document deviations and manage tools and machines. You propose methods to improve efficiency and safety. It is crucial to ensure that aircraft operate safely and efficiently.

### What You Bring

You have an MBO diploma in Aircraft Engineering with a preference for aircraft sheet metal. Even if you are in the process of obtaining your Part certification, this is a plus. You are familiar with reading technical drawings, using quality systems and repair methods, and have knowledge of environmental and safety regulations.

You also have excellent manual skills and strong communication skills in Dutch, both oral and written, and you can read and understand technical English.

### What's in it for You

Fokker Techniek has an ambitious outlook on the future, just like you. We offer an attractive package of employment conditions, including a competitive salary, a solid pension plan, and 27 vacation days + 13 ADV days. In addition, as a company, we have a strong focus on sustainability and offer our employees the opportunity to participate in our bike plan.

### About the Organization

At Fokker Techniek, it's all about one goal: exceeding reliability expectations to keep airplanes where they belong, in the air!

As a Global Independent Aerospace Service Provider, Fokker Techniek creates customized solutions for regional, commercial, special mission (VIP), and military aircraft. They develop, maintain, repair, upgrade, and deliver high-quality solutions for these latest generation aircraft. Fokker Techniek offers component availability and repair programs, spare parts, engineering, modifications, and documentation support. The unique combination of OEM (Original Equipment Manufacturer (design) expertise and after-sales support services makes Fokker Techniek an indispensable partner for the aerospace industry. Fokker Techniek and sister organization Fokker Services are present worldwide, with locations in Europe, Asia, and America.

### **Our Values**

As a High Performance Organization, our core values are reflected in everything we do:

- **Customer Focus:** We do everything we can to meet the needs of our customers by offering unique and customized solutions. We value delivering real collaborations and building sustainable relationships based on quality, safety, and trust.
- **Innovative Thinking:** By offering new and proprietary solutions within chosen markets, we excel in innovative thinking. We dare to lead and make decisions.
- **Global Excellence:** We continually improve ourselves by working cross-functionally and inspiring each other to achieve our shared goals. Furthermore, we work with the highest safety standards and provide our employees with personal development and career advancement opportunities.
- **We Care:** We embrace diversity by embodying equality and inclusion in the workplace. This means being open and honest, and taking the time to listen to each other.

### **Interest**
